

GENERAL SURGERY

ISSUE 1 • JANUARY 2023

HAPPY NEW YEAR!

BY DR. MUTHAMBI

Happy new year from my practice! as we look forward to the new year we look at the past year. We reflect on all the topics that we shared and everything that we learned.

We looked at topics like breast surgery, trauma surgery, peripheral surgery, surgery for the small intestine, surgery to remove benign skin lesions, and surgery to remove blood clots amongst other topics. I hope that all our discussions sparked interest and that you learned a great deal from them.

THANK YOU

FROM DR. T MUTHAMBI

I would like to thank all my patients and all the people I connected with on social media for their support over the past year. I hope you will continue learning and engaging with me this year as I continue to educate you on my discipline.

WHAT TO EXPECT THIS YEAR?

You can expect interesting discussions on general surgery topics, in depth knowledge on diseases and the surgeries done to treat them. You can also expect more engagement with our audience in a form of Q and A's. We will also take suggestions on topics.
